

A photograph of two men in a workshop. The man in the foreground is smiling and holding a large, light-colored wooden board. The man in the background is looking at a vertical wooden board. The scene is lit with dramatic blue and orange lighting, with a blurred background of machinery.

Welcome to HOMAG Treff 2024

It's that time again: HOMAG is opening its factory doors in Schopfloch and Holzbronn from September 24-27!

Experience the latest HOMAG machines and software live in action through a world-class program complete with numerous interactive demonstrations, specialist presentations and personal advice on all aspects of machinery, software, service and support. Inspiration awaits you!

HOMAG Treff is a can't miss event for all woodworking professionals.

**Find out more
about HOMAG
Treff 2024 and
register now!**

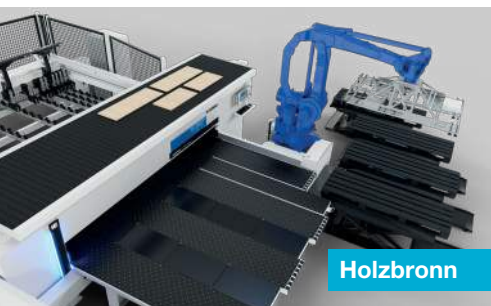

Where sawdust flies and inspiration lands...

**Close to your business. Professionally valuable.
And a memorable experience. That's HOMAG Treff 2024!**

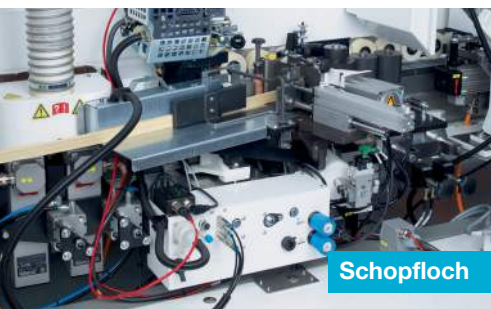

Take the opportunity to talk shop at HOMAG with your colleagues, industry partners, and experts from the fields of machinery, software, service and support about the future of woodworking. You can also meet a number of HOMAG partners as specialist exhibitors who complement the product range.

Holzbronn

Cutting to size: Even more efficiency and networking

- **NEW:** The new basic model of the SAWTEQ S-300 / S-400 flexTec ensures robot efficiency at an entry-level price.
- **Enhanced:** The IntelliDivide Cutting optimization software now offers templates, is networked with the woodStore storage software and calculates the production time with the help of AI.

Schopfloch

Edgeband technology: High-tech for the trade

- **Gantry return LOOPTEQ O-400:** Increases productivity thanks to its high degree of automation, combines stacking system and workpiece return.
- **EDGETEQ S-200:** Now with a new application unit for fast glue changes in just 3 minutes. With servo edge feed, flexible magazine height adjustment and more.
- **EDGETEQ D-610:** It is used for the production of medium to large series with high output and low changeovers. You can use it to format, profile and edge workpieces from two sides in a single pass.

Schopfloch

CNC machining: With new speed

- **STORETEQ F-100:** The single-axis feeder picks up the pace and transforms your CENTATEQ N-210 or N-510 CNC machining center into a complete machining cell – including manual offcut management. The portal works precisely, gently, fully automatically and quickly.
- **DRILLTEQ D-110:** Proven dowelling technology, high performance - the new entry-level CNC handles horizontal drilling and dowelling with up to 3 individually retrievable drilling spindles and up to 4 workpieces particularly effectively.

Schopfloch & Holzbronn

In the virtual world: Software, apps and assistants

- **NEW in productionManager:** You can now enter your post-production components directly in production and transfer them to work preparation with a click. Also new: With the new „batch creation“ function, you can combine your orders into production batches with pinpoint accuracy.
- **Smart assistants:** Saving space and energy? It's easy with quickTip. The new assistant in the woodStore storage software provides setting recommendations. IntelliStore AI - remnants also provides efficiency boosts. The tool reduces stock movements for automatic offcut management by up to 40%.

We look forward to seeing you!
